Open to remote contract and full-time roles · Available for 5–6 hours of overlap with Australian business hours

PROFESSIONAL SUMMARY

Full-stack developer with 4+ years of experience building production web apps, including freelance and contract work since 2022. Currently delivering remotely for an Australian client (whaustralia.com) as sole engineer, and leading a team of six developers at GurukulHub. Strong in TypeScript, React, Next.js and Node.js, with booking, payments (Stripe) and event-ticketing platforms delivered end to end. Hands-on with Docker, CI/CD, staging and production releases, and AWS.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript (ES6+), React, Next.js, React Native, Expo, Redux, Zustand, TanStack Query, Tailwind CSS

Backend & Data: Node.js, Express.js, REST APIs, GraphQL, PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM, Firebase, Stripe, JWT authentication

Cloud & DevOps: AWS (Lambda, S3, API Gateway, ECS, IAM, SNS), Docker, GitHub Actions, GitLab CI, event-driven architecture, staging and production deployments

Practices: System design, code reviews, unit testing, error tracking, rollback runbooks, technical leadership

PROFESSIONAL EXPERIENCE

Sunyaverse — Full-Stack Developer (Freelance) Jan 2026 – Present

Remote, Australia

- Designed and built **whaustralia.com** end to end as sole engineer: an Australian community platform for discovering and promoting local businesses, services and events.
- Built a booking and scheduling system that lets businesses manage employee shifts, working days and days off, and connects staff or independent providers with customer bookings.
- Added event ticketing with **Stripe** payments and **QR check-in**, plus a business dashboard for bookings, sales and ticket redemptions.
- Hardened the platform with Redis-backed rate limiting and CSRF/XSS protection.
- Building a **React Native**/Expo mobile app on the same backend APIs (in progress).

GurukulHub — Full-Stack Developer Oct 2025 – Present

Maharajgunj, Kathmandu, Nepal

- Lead a team of **six developers** across multiple projects, guiding delivery from development through production release.
- Set up CI/CD pipelines and manage deployments across separate staging and production environments.
- Containerized applications with **Docker**, building and managing images for consistent, repeatable deployments, and resolve deployment failures.

Suvaansh Group — Web Developer / Marketing Manager Jun 2025 – Apr 2026

Full-time Jun 2025 – Oct 2025; freelance Oct 2025 – Apr 2026

- Built and maintained websites for Australian clients, including **bamboohomesupport.com.au** and **bamboonursing.com.au** (WordPress).
- Built **navigatewell.com.au** (WordPress), the website for an Australian NDIS support-coordination provider.
- Managed social media and designed posts for three companies at once: Bamboo Home Support, Bamboo Nursing and Navigate Well.

Fatdog Labs Agency — Junior Frontend Developer Mar 2024 – Feb 2025

Guhyeshwori, Kathmandu, Nepal

- Developed 3+ dynamic web applications with **Next.js**, TypeScript and GraphQL for agency clients.
- Implemented state management (Redux, Zustand) and data fetching (TanStack Query) to speed up page loads.
- Integrated REST APIs with designers and backend teams.

Earlier Freelance & Contract Work 2022 – Feb 2024

- **nationalhomedecor.com.np** (Maa Kali Hardware, 2022): full-stack online store with Next.js, Node.js and TypeScript — cart, eSewa payments, blog and admin panel.
- **ssstoreandsuppliers.com** (SS Store & Suppliers, Oct 2023 – Feb 2024): React.js and GSAP e-commerce site with streamlined checkout and technical SEO.
- **Hotel Royal Sen** (2022): mobile-first hotel booking site built with SASS and JavaScript.

PROJECTS

EMS (Employee Management System) — Next.js, TypeScript, MongoDB, AWS S3 Sep 2026 – Present

Live product · source on GitHub

- Designed and built an all-in-one business system covering employees, field jobs, products and stock, and accounting, with a separate workspace and public website for each business.
- Added geofenced check-ins (staff can only check in near the job site), an offline check-in queue, and unit-tested accounting for ledgers, day book and estimates.

EDUCATION

B.IT, University of Sunderland (taught at ISMT College, Tinkune, Kathmandu) 2019 – 2023
